

THE  
**OYSTER  
RESTORATION**  
COMPANY

# Rapid Reef

Rapid Reef is a ready-to-deploy solution for biogenic reef restoration, creating a foundation of native oysters settled on recycled scallop shells.

Deliverable for grassroots or large-scale projects, it simplifies planning and scheduling, enhancing biodiversity, whilst delivering measurable impact from day one.

## Benefits

### Impact

Each bag establishes a living oyster reef that actively supports coastal ecosystem revival.

### Scalability

Rapid Reef bags are a cost-effective way to scale marine restoration efforts.

### Sustainability & Eco-Impact

Designed with environmental integrity in mind, Rapid Reef restores essential marine habitats in a sustainable, scalable manner that aligns with biodiversity and community goals.

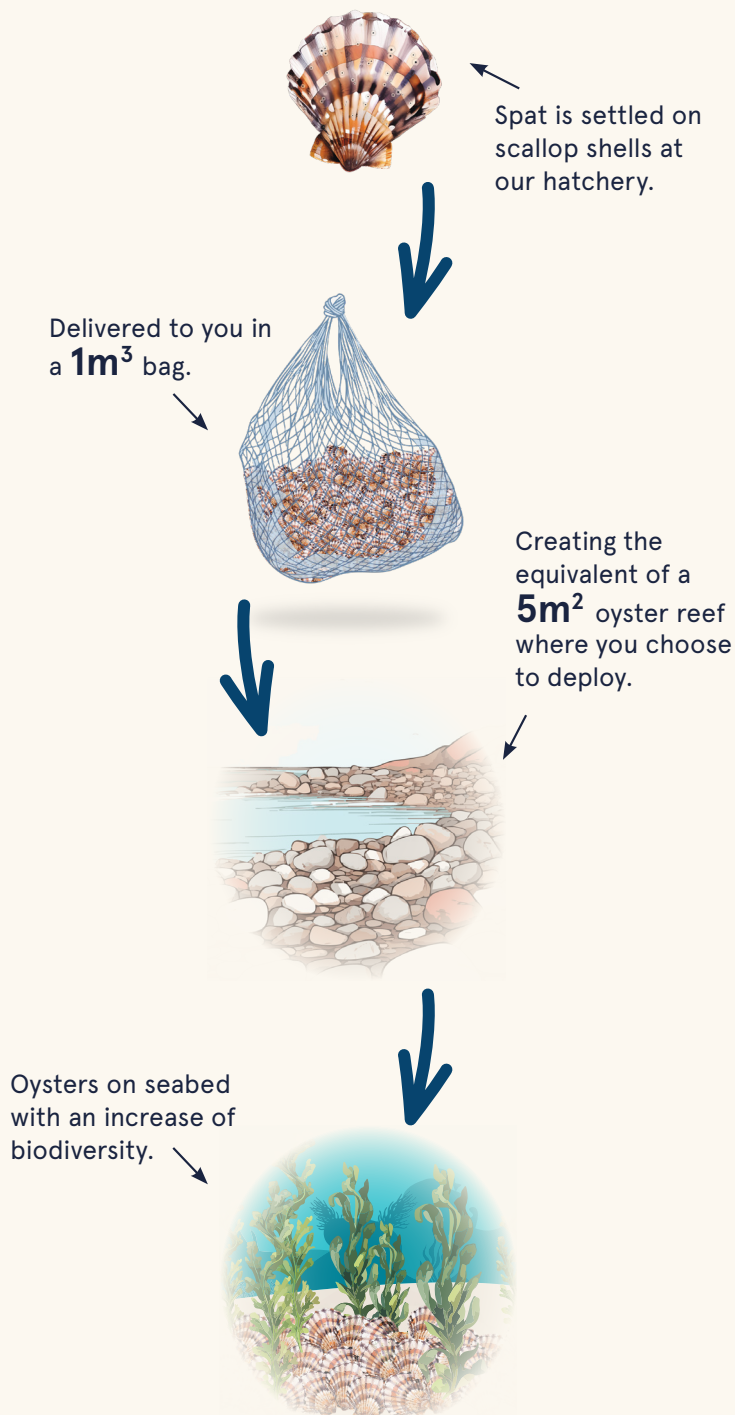

### Comprehensive Support

From project planning to supply, we can help! Simplifying restoration project management to ensure a streamlined and effective deployment experience.

### High Biosecurity Standards

- Native only fully biosecure hatchery.
- Registered disease-free.
- UV-treated and 1 micron-filtered seawater.
- Assured free of invasive or non-natives species.
- Direct application from hatchery to site.

## How it Works

# Key Features

THE  
**OYSTER  
RESTORATION**  
COMPANY

## **Effective Area Coverage**

Each 1m<sup>3</sup> bag provides dense coverage of approximately 5m<sup>2</sup> of seabed, fostering the growth of resilient oyster reefs that support diverse marine life and enhance biodiversity. Easily scalable.

## **Flexible Deployment**

Rapid Reef bags are adaptable to various marine environments and can be deployed manually or by a vessel of choice. Its modular design enables precise reef planning, making it easy to scale restoration projects of any size. Other deployment methods available at an additional cost.

## **Eco-Friendly Materials**

Recycled shell material provide an ideal substrate for oyster spat, promoting natural reef regeneration and supporting long-term ecosystem stability. Other substrate available to suit your project needs, please get in touch to find out more.

## **Reliable Delivery**

Our Rapid Reef is packaged in compact, manageable 1m<sup>3</sup> units, backed by a logistics network for safe, timely delivery. Rapid Reef bags can be populated in as little as 2 months ensuring reliable supply for your restoration goals when you need it.

## Specification

Product Weight	151kg
Volume of Oysters Included	30,000
Prices Start From	£5000 / m <sup>3</sup>
